

EDUCATION

- **University of Engineering and Technology - VNU** UET, VNU
Artificial Intelligence; GPA: 3.00 *Aug. 2022 – Dec. 2025*
- **Course works::** Machine learning, Deep learning, DSA, OOP, Probability and Statistic, Reinforment learning, ...

INTERESTS

- **English:** Learning English and improving communication skills.
- **Volleyball:** Playing volleyball and participating in team sports.
- **Music:** Listening to music to relax and stay inspired.

EXPERIENCE

- I have basic experience in artificial intelligence through exposure to several related specialized courses, such as Deep learning, Machine learning, Natural Language Processing (NLP), reinforcement learning, big data, image processing, GPU parallel programming, and AI system design, etc ...

PROJECTS

- **Named Entity Recognition** Dec 6 – Dec 15, 2024
Build the model-NLP from scratch in PyTorch
 - **Description:** Built a deep learning model for Named Entity Recognition (NER) to identify and classify entities in text.
 - **Main Tasks:** Designed and compared CNN + BiLSTM and CNN + BiGRU architectures from scratch.
 - **Technologies:** PyTorch, Python
- **ragPdfTool** May 2025
RAG + LLMs — developing
 - **Description:** A web-based tool that enables users to upload PDF files and interactively extract information using RAG.
 - **Main Tasks:** Parse PDFs, create embedding index, support user queries via LLMs, and design UI.
 - **Technologies:** Python, Flask, Langchain, Docker, HTML, CSS
- **Model Inversion Attack and Defend** May 15 – May 25, 2025
GAN-based model analysis
 - **Description:** Analyzed privacy risks in ML by simulating inversion attacks on MRI datasets.
 - **Main Tasks:** Used WGAN-GP to reconstruct images, tested defenses, and visualized results.
 - **Technologies:** Python, PyTorch, TensorFlow, Matplotlib
- **Teacher Web** May 2 – May 19, 2024
Web Backend — developing
 - **Description:** A platform to connect teachers and students through requests, accounts, and messaging.
 - **Main Tasks:** Implemented backend logic (CRUD, authentication), designed schema, and connected frontend.
 - **Technologies:** Flask, HTML, CSS, JavaScript, MySQL, Bootstrap

PROGRAMMING SKILLS

- **Languages / Databases:** Python, C/C++, Java, MySQL, SQL Server, ...
- **Platforms / Frameworks / Libraries:** Linux (Ubuntu), PyTorch, TensorFlow, Flask, Django, FastAPI, Pandas, NumPy, Matplotlib, ...
- **Tools:** Docker, Git, GitHub, ...
